CHEMIST

Research & development

Permanent | 36h | Full-time, Day | 4 day weeks | Monday to Thursday

For 45 years, Glass Shield has manufactured high performance paints for multiple industrial fields and continues to grow. We are known for our high quality products, but first and foremost, for the quality of our services and of our employees.

MAIN DUTIES

- In charge of development of new epoxies, polyurethanes, alkyds and other specialized resins
- Evaluating and selecting the different chemical components according to the requirements of various objectives, evaluation of resins, adjuvants and pigments
- Testing and monitoring paint productions for quality control
- Writing various technical data sheets and material safety data sheets
- Writing progress reports following the stages of development, diagrams and tests based on research & development files
- Provide training and technical support to the various stakeholders of the company: follow-up with customers for feedback after adjusting the formulations
- Solve problems encountered during the paint application process
- Follow up on laboratory and production format tests to fine-tune various formulations in order to comply with the environmental standards in force and the requirements of applicators
- Continuous training program and advancement possibilities
